PRODUCT MANAGEMENT

PRODUCT DISCONTINUATION NETLink PRO/USB

Dear customer, Nürnberg, 20.11.2012

this is to inform you about the discontinuation of our product NETLink PRO/USB to be effective by 31.12.2012.

As a replacement we offer you NETLink PRO/ETH. Instead of an USB interface, NETLink PRO/ETH has an Ethernet interface, which allows 7 simultaneous Ethernet connections with a maximum speed of 100 MBit/s.

If you should still require NETLink PRO/USB, we offer you the possibility of a last buy with a procedure as described below:

- Please place an order for the required NETLink PRO/USB components latest by 14.12.2012. All incoming orders will be collected until this deadline to optimize a possible last manufacturing process.
- The estimated delivery date will be announced with the acceptance of order.
- Components, which are available from stock, will be delivered right away.
- Components, which have to be assembled in the last manufacturing process, will be delivered at the estimated delivery date announced in the acceptance of order.

The regular product maintenance of NETLink PRO/USB will be ceased by 31.12.2012. Maintenance work due to guarantee claims will be performed independent from that date according to the legal regulations.

If you should still require NETLink PRO/USB maintenance or extensions in future, we will try to offer you appropriate services on project base depending on our possibilities.
